PROFESSIONAL SUMMARY

Senior Software Engineer and Solution Designer with over 10 years of experience building robust, large-scale distributed systems. Expert in Java and cloud-native architectures (AWS), with a proven track record in fintech, autonomous vehicles, and telecom. Recognized for taking deep ownership of code and successfully navigating highly regulated, mission-critical environments.

WORK EXPERIENCE

PayPal

Senior Software Engineer | May 2023 – Present

- Architect and develop large-scale payment and payout processing systems within a regulated fintech environment.
- Design and maintain AWS-based infrastructure, leveraging ECS, Lambda, API Gateway, and CloudFront with mTLS-secured communications.
- Manage secure cloud environments using IAM, KMS, and Parameter Store, ensuring compliance with fintech regulations.
- Implement robust networking and traffic management via VPC, Route 53, and Load Balancing (ALB/NLB).
- **Tech:** Java, Spring, AWS (ECS, Lambda, S3, CloudFront, API Gateway, IAM, KMS, Parameter Store, VPC, Route 53, ELB), Terraform, PostgreSQL, Datadog, Splunk.

Polar Cape (Consultancy)

Senior Software Engineering Consultant | Oct 2018 – May 2023

- **Scania Group (R&D):** Contributed to autonomous vehicle systems and distributed backend platforms. Developed event-driven microservices using Kafka and AWS (SNS/SQS, DynamoDB) to handle performance-sensitive workloads.
- **Telenor Sweden:** Led a legacy-to-microservices transformation project aligned with TM Forum standards, focusing on scalability and architectural modernization in a complex telecom ecosystem.
- **Tech:** Java, C++, Kafka, AWS, Docker, Kubernetes, Jenkins, DynamoDB, Grafana.

Axeltra

Software Developer | Apr 2017 – Oct 2018

- Developed a high-performance recruitment platform using React and TypeScript.
- Built and maintained an internal reusable UI component library, optimizing data-heavy interfaces for candidate management.
- **Tech:** React, TypeScript, Styled Components.

Digital MediaLab

Java / NodeJS Developer | Jun 2015 – Apr 2017

- Developed backend middleware for Telenor's mobile banking applications, ensuring high data consistency across platforms.
- Built a social gifting platform integrated with Facebook APIs using Node.js and MongoDB.
- **Tech:** Java EE, Node.js, Spring Boot, MongoDB, Maven.

Seavus

Java Software Engineer | *Jun 2014 – Jun 2015*

- Engineered enterprise search and intelligence platforms and insurance-focused mobile applications with offline functionality.
 - **Tech:** Java, Spring Boot, Hibernate, Attivio.
-

CORE SKILLS

- **Backend:** Java (Modern versions), Spring Boot, Node.js, C++, Dropwizard.
 - **Cloud & Infrastructure:** AWS (Lambda, S3, API Gateway, CloudFront), Terraform, Docker, Kubernetes.
 - **Data & Messaging:** PostgreSQL, DynamoDB, Kafka, AWS SNS/SQS, Liquibase.
 - **Observability:** Datadog, Splunk, PagerDuty, Grafana, ELK Stack.
 - **Frontend:** React, TypeScript.
-

EDUCATION

Ss. Cyril and Methodius University (Skopje, North Macedonia)

Computer Science & Engineering | 2009 – 2013

LANGUAGES

- **English:** Full Professional Proficiency
- **Macedonian:** Native
- **German:** Elementary Proficiency
